

- 
- The screenshot shows a web-based interface for a BRS (Biochemical Research System) form. At the top, there are several buttons: "Search", "Print", "Browse", "Insert", and "Clear". Below these, there are two input fields: "DBs" with the value "US-PG PUB; USPAT" and "Default generator" with the value "OR". To the right of these fields, there are two checkboxes: "Burst" (unchecked) and "Highlight all hit terms initially" (checked). The main content area displays a search result: "quantin\$ and \"704\"/200.1.ccls. and @ad<\"19991005\" and masking adj threshold". Below this text, there is a large, empty rectangular area, likely for displaying additional details or images. At the bottom of the interface, there is a navigation bar with icons and labels for "BRS form", "IS&R form", "Image", "Text", and "HTML".

A screenshot of a web browser's status bar. The status bar is divided into two sections. The left section displays the word "Ready" in a black font. The right section displays the text "NUM" in a black font, followed by a vertical line and a small, partially visible character.
